BIM MANAGER SUITE™

"The applications work like a charm, thank you so much!"

- Eleen Quan, SVA International

BIM
Manager Suite

"Family Processor is a wickedly cool tool."
- Robert Beckerbauer, RDG Planning & Design

Family Tools
Deletes backup files, compares and merges shared parameter files, reports saved Revit® versions.

Project Cleaner
Deletes views, sheets and Revit links. Lighten models from consultants before linking them into your projects.

Revision Cloud Remover
Removes non-issued revision clouds from your project. List the revision clouds in a project, including the quantity of each. Select which revision clouds to remove, or remove all of them.

Dimension Checker
Identifies dimension strings that use the dimension override options and presents the results for review. Additional filter options can be used to narrow the search results.

Family Processor
Defines one or multiple changes to one or more Revit family files, then processes those changes in batch.

Family Checker
Reports on how well Revit families conform to standards. Identifies potential consistency and quality issues in families.

BIM Manager Suite has extremely powerful tools to automate many common, complex or critical tasks for Revit projects and families. This suite is aimed at BIM experts and power users whose tasks often include establishing workflows, maintaining company standards, building Revit content, maintaining company libraries, fixing problematic projects and supporting an organization's BIM program.

Return On Investment

The tools in this suite can save several hours per week for BIM managers. Repetitive tasks such as modifying and updating families, checking dimensions, swapping and cleaning types, correcting model link paths, building shared parameters files and more are reduced from hours to minutes!

BIM
Manager Suite

"Professional and easy to handle software."
- Eivind Trahaug, Rambøll Norge AS

CTC SOFTWARE™
DESIGN SOLUTIONS

Import & Link Manager

ILM

Assists with locating and managing CAD objects within a Revit model. Find imported or linked DWG files in your Revit project. Batch change workset assignments of imports.

Schedule Parameter Resolver

SPR

Makes it fast and easy to synchronize multiple schedules by changing the parameter definitions in the schedules to match those used in the families.
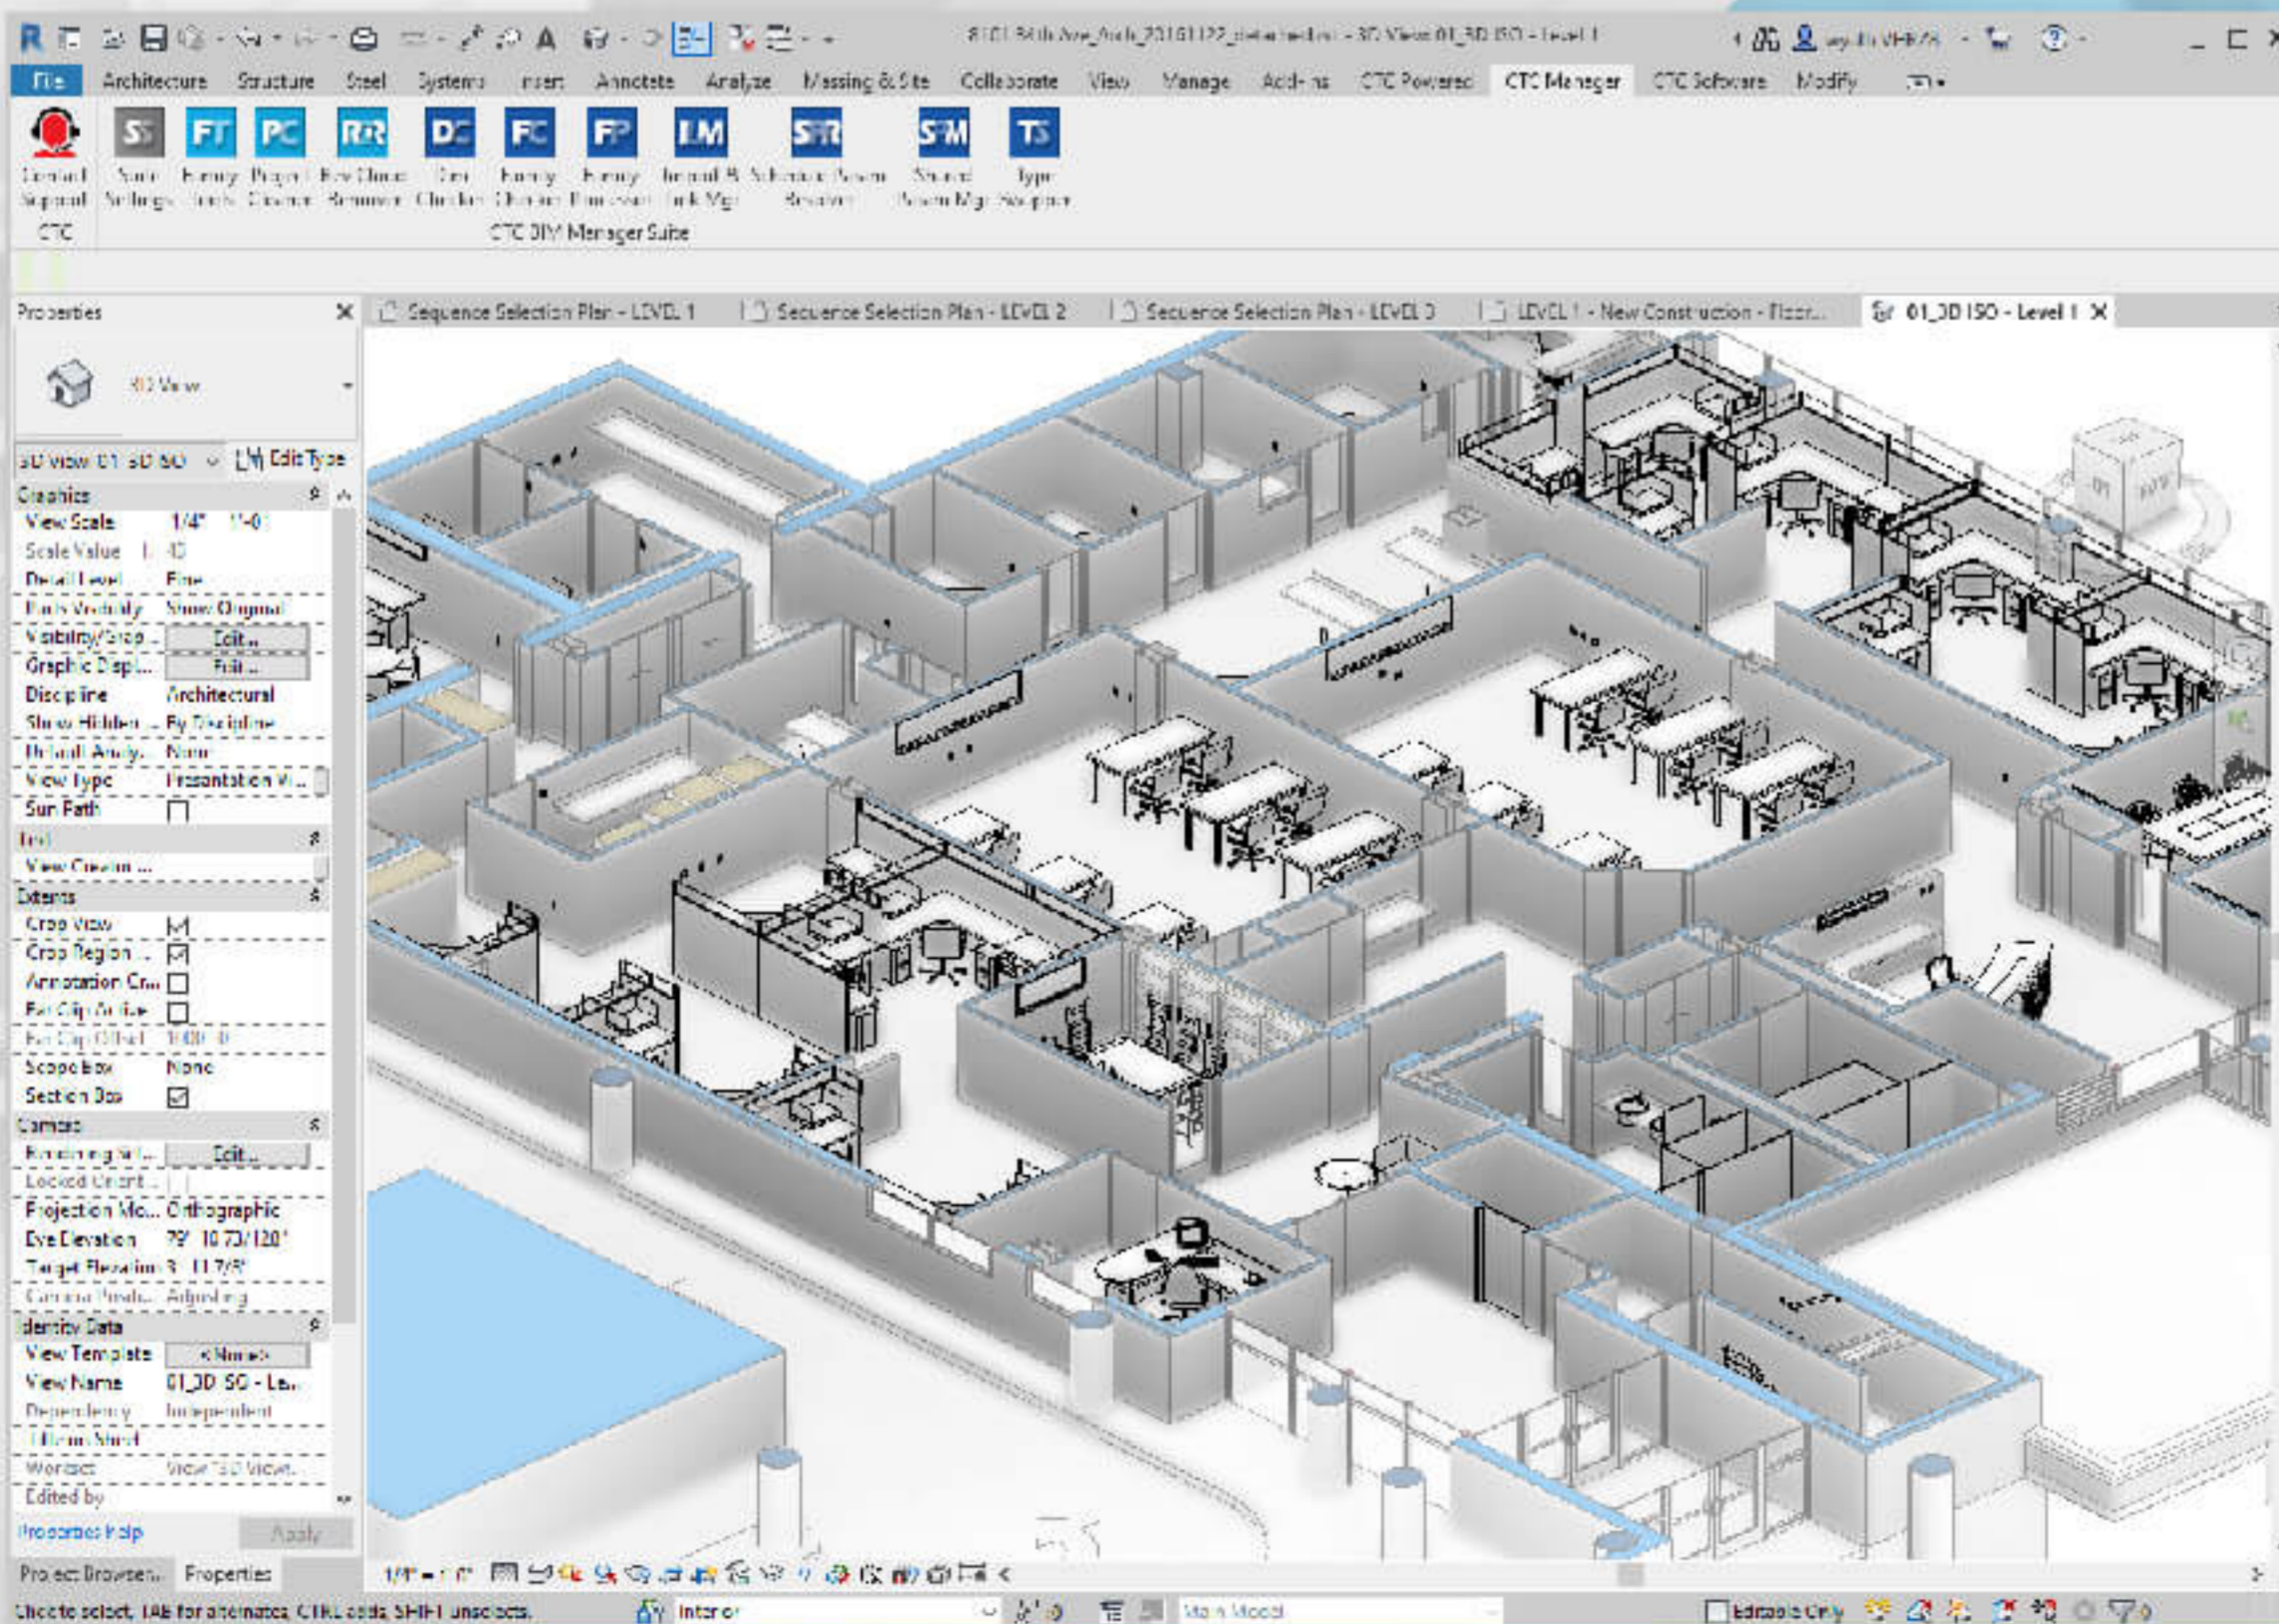

Shared Parameter Manager

SPM

Reorganizes shared parameters via drag and drop, both within a single shared parameters file or between two files.

Type Swapper

TS

Makes swapping types – and even families – a straightforward and speedy process. Discover the simplicity of identifying and deleting duplicates.
