Common Challenges

- Casework libraries for Revit® take a lot of time to create
- Out of the box and downloaded content has limited flexibility
- Choosing between quality and detail vs size and performance
- Standard insertion and placement tools are not optimal

Solution - Casework Configurator

- Generate dozens of ready-to-use assemblies
- Quick selection from a variety of sizes, types and hardware
- Configured casework can be placed directly using the interface or loaded into the project for later use
- Build a complete comprehensive casework library without adding complexity
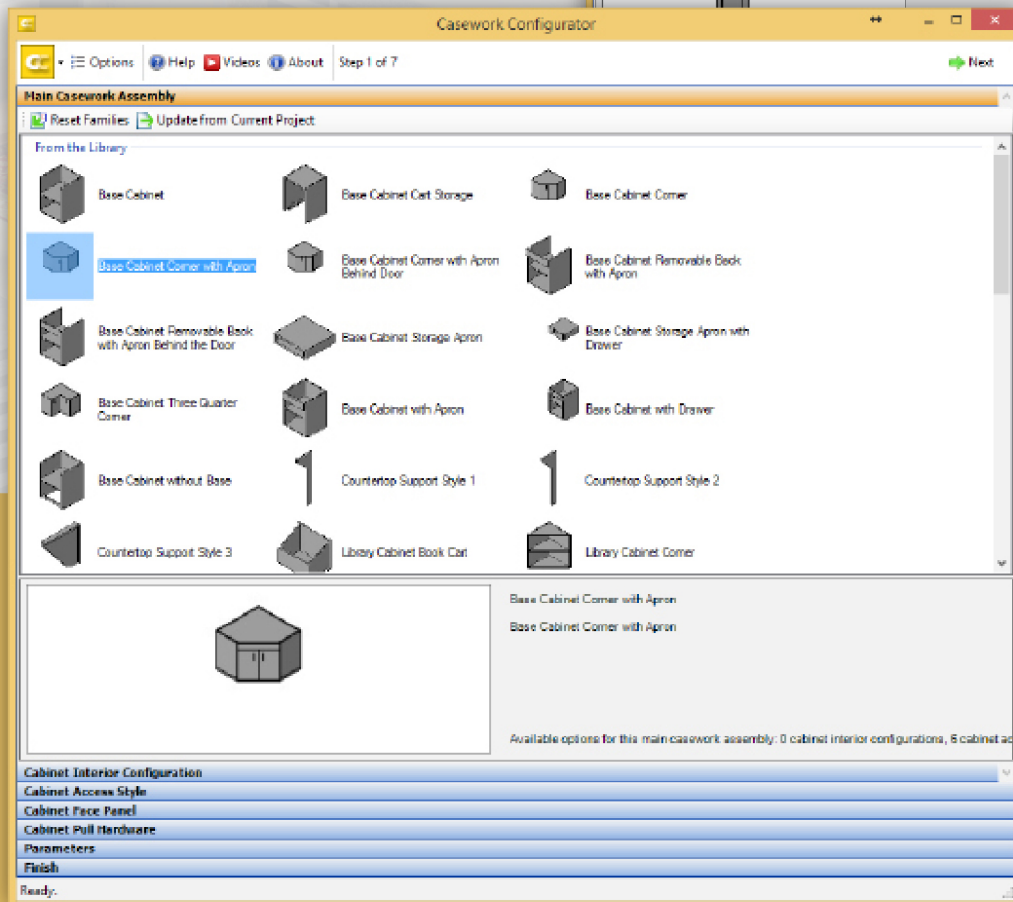

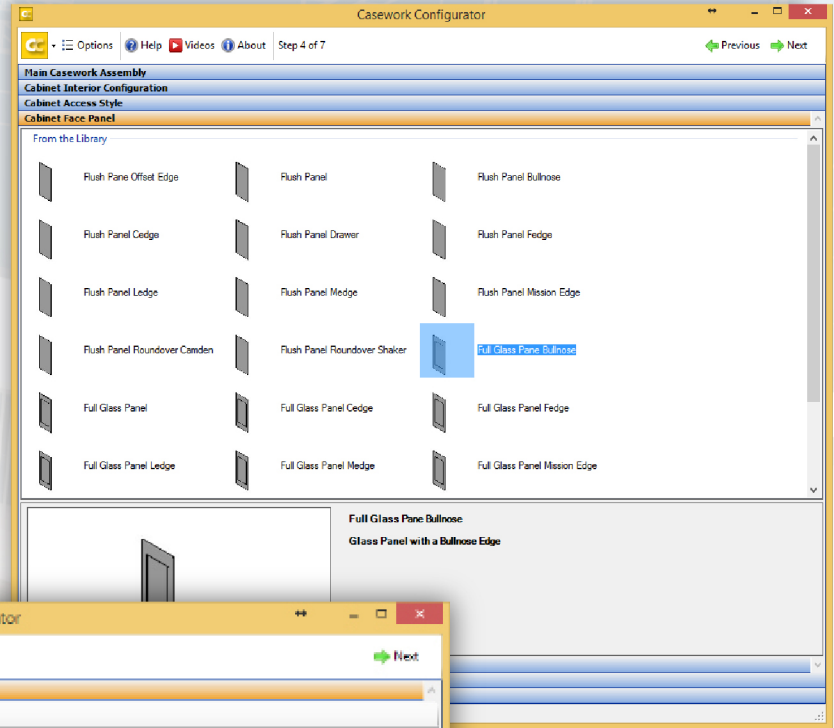

Source of ROI - Return on Investment Realized

- Greatly reduces management of content
- Increased accuracy and error reduction emphasized by pre-created, standardized casework families.
- Manage and maintain the library with dedicated Casework Admin Tool
- Fully supported by CTC staff
