SuperDoor Configurator™

"Well Done CTC."
- Dick Bates, Knuston Construction

Common Challenges

- Door libraries for Revit® take a lot of time to create
- Out of the box and downloaded content has limited flexibility
- Choosing between quality and detail vs size and performance
- Standard insertion and placement tools are not optimal

Solution - SuperDoor Configurator

- Generate dozens of ready-to-use assemblies
- Quick selection from a variety of sizes, types and hardware
- Configurator doors can be placed directly using the interface or loaded into the project for later use
- Build a complete and comprehensive door library without adding complexity

Source of ROI - Return on Investment Realized

- Greatly reduces management of content
- Increased accuracy and error reduction emphasized by pre-created, standardized door families
- Manage and maintain the library with the dedicated SuperDoor Admin Tool
- Fully supported by CTC staff

SuperDoor Configurator Overview

SuperDoor includes content (Revit families) for building a nearly infinite variety of doors, and software which provides a graphical wizard interface that guides Revit users through selecting/configured doors can be placed directly using the interface or loaded into the project for later use.

SuperDoor Configurator™

"CTC is always very helpful, extremely knowledgeable, and a pleasure to work with."

- Freeman & Major Architects
